VERSE 1

Did you ever wonder how far you'd get
riding that lie of no regret
one night you wake up in a cold, cold sweat
and realize you've been found
my memory has tracked you down

VERSE 2

Snuck in through the back door of your mind
the dreams you wrecked and left behind
turn to guilt every thought they find
unlock your conscience without a key
in walks my memory

CHORUS

And it's here to collect what you didn't pay
it won't leave anywhere you stay
new forever clock starts today
you've counted your last minute
without my memory in it
Twisted lies come undone
fall apart one by one
tormented heart tries to run
but it can't break free
from my memory

VERSE 3

Warm breath brings ripples across your skin
between the sheets you let me in
close your eyes try and pretend
it's someone else you see
but it's still my memory

BRIDGE

Thought you outran your past and time
bet you never planned on a memory like mine, a memory like mine

CHORUS

And it's here to collect what you didn't pay
it won't leave anywhere you stay
new forever clock starts today
you've counted your last minute
without my memory in it
Twisted lies come undone
fall apart one by one
tormented heart tries to run
but it can't break free
from my memory
